RoHS Certificate of Compliance

Novak Electronics, Inc.
As of July 20, 2006
Page 1 of 3

The products identified below are in compliance with the European Union Directive 2002/95/EC on the restriction of use of certain hazardous substances ("**RoHS Directive**").

Based on information provided by our suppliers, Novak Electronics, Inc. designates the products listed below as RoHS compliant for orders based on or after the date of this certificate.

RoHS compliant means that:

- Our supplier has confirmed the compliance status of the relevant products to us.
- We have implemented rigorous processes to confirm and document this.
- We perform material content testing where appropriate.

Confirmation of compliance status by our suppliers is either because the products do not contain any of the restricted substances referred to in the European Union Commission Decision of August 18, 2005 (2005/618/EC) in connection with Articles 4 and 5 of the RoHS Directive in concentrations in excess of the values permitted thereunder or because removal of the restricted substances is not technically possible and their existence in the products at levels in excess of these concentrations is allowed as one of the particular applications listed in the Annex to the RoHS Directive.

For purposes of this RoHS Certificate, the maximum concentration values of the restricted substances by weight of homogeneous materials are:

- Hexavalent chromium 1,000 ppm
- Poly-brominated biphenyls (PBB's) 1,000 ppm
- Poly-brominated diphenyl ethers (PBDE's) 1,000 ppm
- Cadmium 100 ppm
- Mercury 1,000 ppm
- Lead 1,000 ppm

The list of RoHS compliant Novak product is provided on the following page. Novak is committed to meeting the compliance for all products, and this RoHS Certificate of Compliance will be periodically updated.
